

Jaunt Trapeze and Operational Project

- In 2022 Texas A&M completed an operational analysis of Jaunt's DRT and ADA to help Jaunt further improve service efficiency and quality
- The analysis focused the use of Trapeze to provide optimal service efficiency as well best industry practices to improve upon service standards managing resources and trips

IMPLEMENTATION OF STUDY RECCOMENDATIONS

WORKING
TASK LIST

Immediate Tasks
Short Term Tasks
Long Term Tasks

Recommendations

- Issue Client ID's
- Create Script to help ensure consistent customer experience when calling Jaunt
- Reduce 14 day booking window to 7
- Establish a 30 minute pick up window on all trips.
+15/-15
- Re-start No Show and Late Cancellation Policy

5:19 PM 4/27/2023

Batch
Scheduling

Run Cutting

Scheduling

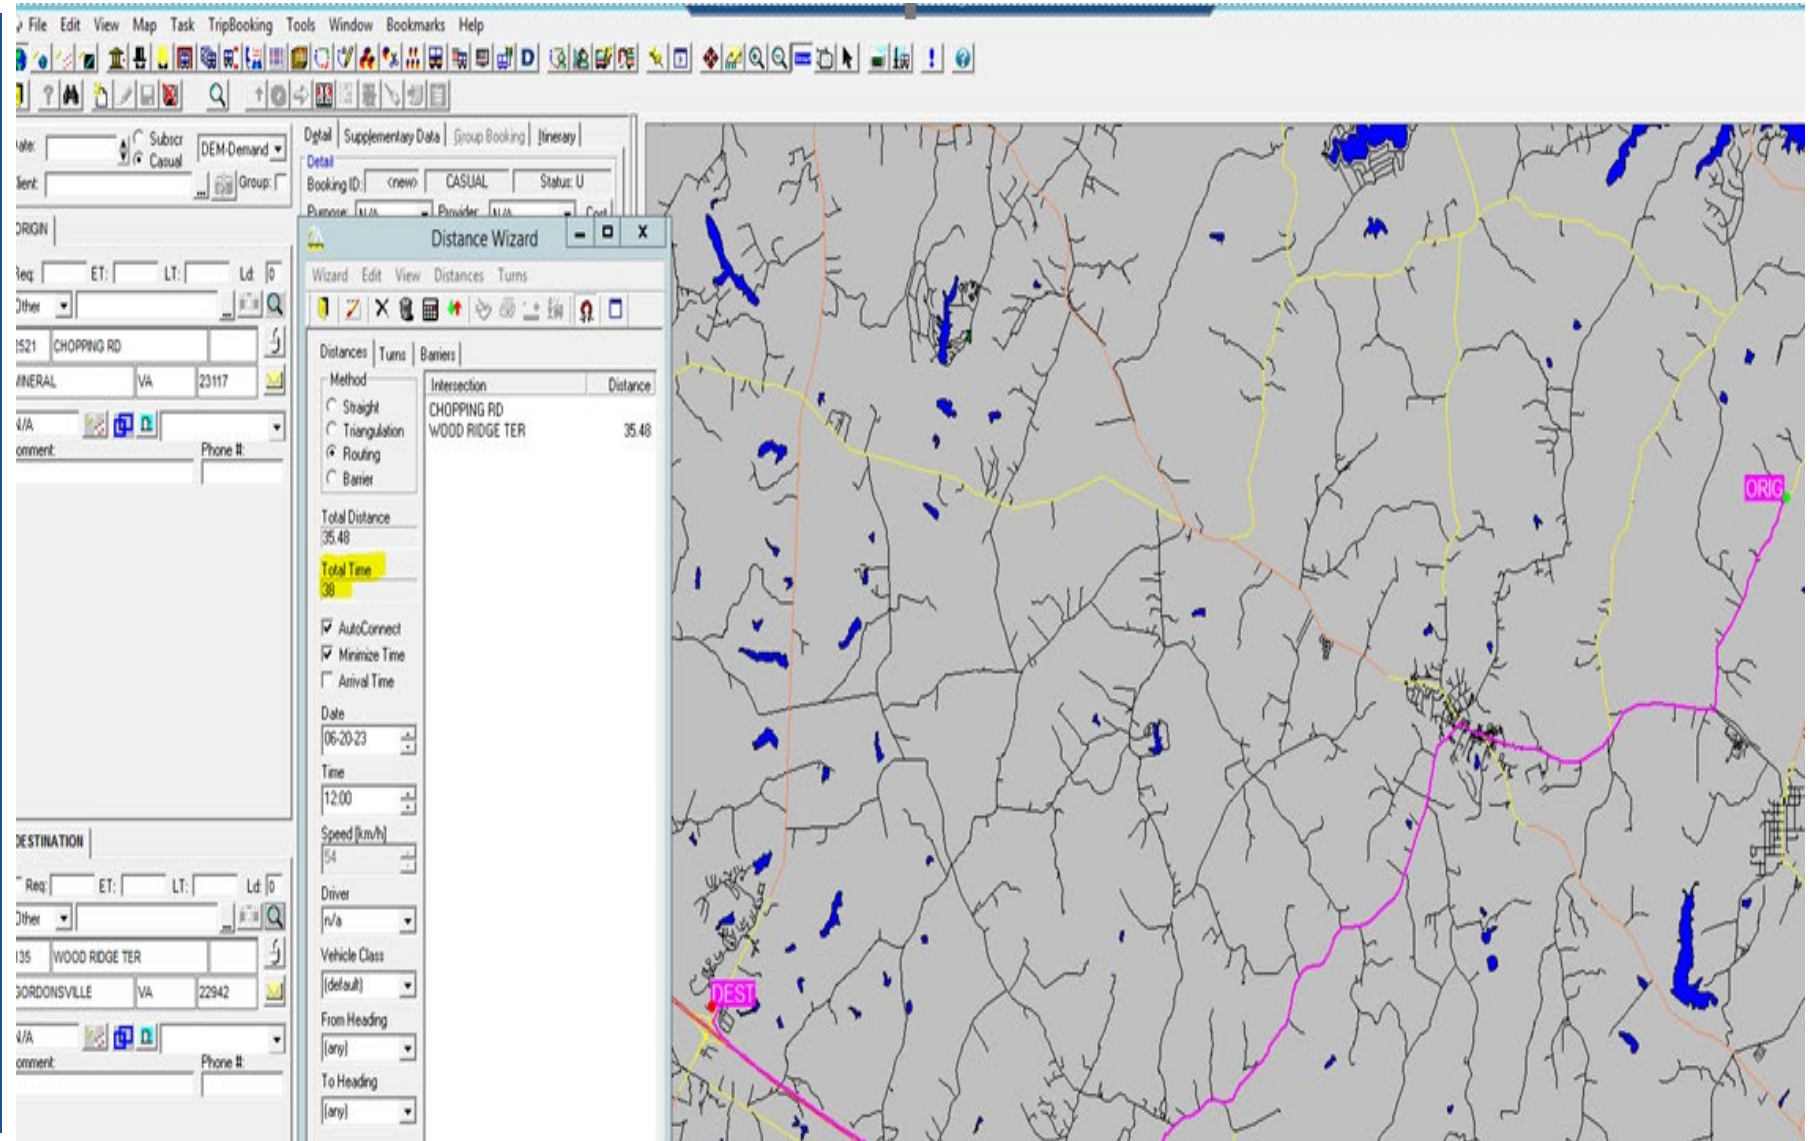

- Trapeze Parameters being set to Jaunts objectives
- Para Services corrected to fit current service
- Allowing Reservationist to do “real time” scheduling to route when booking a trip

Run Cutting

- Help identify how many drivers and vehicles are needed to efficiently run service.
- Reduce slack time, driver pay hours/match revenue hours
- Create better workforce/service schedules

MAP UPGRADE

- Previous map speed calculated travel in kilometers. New map will calculate in miles
- Improved geocoding accuracy for Customer Address and Trip Booking
- Correct speeds for travel time and will help improve scheduled runs.

PASS COM

- One stop location to house customer complaints, concerns and commendation
- Entry and Investigative Screen
- Easy add from Trip Admin
- Reporting Features

The screenshot displays the 'COM Representative' window of the PASS COM software. The interface is divided into several sections for data entry:

- Feedback Information:** Fields for Feedback Id, Date Received, Time Received, Date Logged, Time Logged, Logged By, Method Received By, Feedback Type, Estimate PU Time, Feedback Subtype, Incident Date, and Incident Details (a large text area).
- Customer Information:** Fields for Pass Client, First Name, Last Name, Address, City, Zip/Postal, Email, Home Phone, and Business Phone.
- Incident Details:** Fields for Priority, Target Date, Incident Start Time, and Incident End Time.
- Summary and Log:** Fields for Summary, Investigator Log, Response to Customer, Resolution of Issue, and Response Required (with a checkbox).
- Employee Information:** Fields for Employee Description, Department, Cell Phone, and Vehicle Number.
- Administrative Fields:** Closed (checkbox), Date Closed, and Closed By.

The bottom of the window features a 'View' button for attachments and a status bar with the text 'Ready' and 'New Message MODIFIED CAP NUM SCRL'. The taskbar at the very bottom shows the 'Jentent' logo.
